### Introductory note

#### This introductory note does not form a part of the notice

Under the Environmental Permitting (England & Wales) Regulations 2016 (schedule 5, part 1, paragraph 19) a variation may comprise a consolidated permit reflecting the variations and a notice specifying the variations included in that consolidated permit.

Schedule 1 of the notice specifies the conditions that have been varied and schedule 2 comprises a consolidated permit which reflects the variations being made. All the conditions of the permit have been varied and are subject to the right of appeal.

The operator has applied to vary their permit from a standard rules SR2009 No5 - inert and excavation waste transfer station, to a bespoke permit - transfer station taking non-biodegradable waste. This is to allow the addition of waste codes that are not listed on the standard rules permit. There are no changes to the activities, throughput or permitted boundary of the site.

The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
